AP Course Failure Policy

Intent:

Upon completion of an AP Course the results will be reviewed by the employee and their RS_Tech. If the results are negative, the employee will be placed on a PIP by their RS_TEC, and will have 6 months to complete the PIP. At the completion of the PIP the employee must pass the course final exam. (written and/or practical, proctored by the AP school instructor of the course and or the Assessor team). The student will be given one opportunity to retest.

The minimum waiting period to retest will be based on a sliding scale of 4 weeks to 12 weeks.

The wait period will be determined as follows:

- Five (5) points or less below passing score. Minimum of four (4) weeks.
- Six (6) to Ten (10) points below passing score. Minimum of eight (8) weeks.
- Greater than Ten (10) points below passing score. Minimum of twelve (12) weeks.

Upon failure of the AP course, all future AP courses scheduled for the employee may be, at the discretion of the plant, dropped from the employee's future training schedule. Upon successful completion of the above stated requirement the remaining requisite AP courses will be rescheduled as available.

Scope:

This AP course Failure policy only applies to the following AP Courses:

IMT – Industrial Mechanical Technology
ECT – Electrical Control Technology
PNE – Pneumatics Technology (changing to Fluid Power 1/1/2025)
HYD – Hydraulics Technology (changing to Fluid Power 1/1/2025)
FP- Fluid Power
PLC-C – PLC Concepts
PLC – 5 – Allen Bradley PLC-5
CTRLGXINTRO – Allen Bradley CTRLGXINTRO
SLC500 – SLC 500

ACD - AC Drives

The on-site Maintenance Technical Training Coordinator will coordinate with AP School and or the Technical Assessor team to schedule the employee to take the final exam at the AP School.

Automation Courses:

At the RSTEC's discretion only the first automation course (CTRLGXINTRO, PLC-5, OR SLC500) that the employee attends may be subject to this course failure policy.

AP Course Remediation Responsibilities:

It is the responsibility of the employee to seek assistance to help close the gaps in understanding of the course material of the failed AP course. The Maintenance Technical Training coordinator can be contacted for this assistance and to administer testing to assess the employees' level of understanding before the employee attempts the Final exam (written and/or practical).

Failure to Complete PIP Requirements:

If the employee fails to successfully complete the Final exam (written and/or practical) within the 6 months, other options for their employment will be considered outside of maintenance, as well as the potential separation from the company.
